## INTRODUCTION

## Who We Are

**BALA INDIA is a premier provider of specialized construction solutions aimed at enhancing the structural integrity and safety of buildings, bridges, and various infrastructure projects.**

With a commitment to excellence, innovation, and reliability, we offer a comprehensive range of anchor fixing and rebar fixing services to meet the diverse needs of our clients in the construction industry.

Company  
**BALA INDIA**

Location  
**Surat, Gujarat, India**

Established  
**2020**

Coverage  
**Across India**

*To provide top-notch Construction solutions that ensure the stability of structures, Safety & Productivity at site, contributing to the growth & Innovations of the construction industry.*

— **Mission Statement, Bala India**

## ★ WHY CHOOSE US

## Our Core Strengths

### Expertise

Experienced engineers and technicians with extensive knowledge in anchor fixing and rebar techniques.

### Quality

High-quality materials adhering to industry standards for durability and safety of structures.

### Innovation

Latest advancements in anchor and rebar fixing technologies for innovative solutions.

### Customization

Tailor-made solutions to meet the specific requirements of each unique project.

### Safety

Strict safety protocols to protect both workers and the surrounding environment.

### Timely Execution

Efficient processes and skilled team ensure on-time project completion every time.

## SERVICES

## Our Expert Services

We are one of the eminent service providers for Anchor Fixing, Rebar Fixing, and Core Cutting – known for precision diamond drilling and Hilti-approved application methods.

### 1. Anchor Fixing Services

Rotary percussion or diamond core drilling of holes from 8mm to 65mm. Ideal for steel erections, lifting bolts, and general fixings in concrete slabs, walls, or masonry blocks.

- Mechanical Anchor Installation
- Chemical Anchor Installation
- Expansion Anchor Placement
- Custom Anchor Solutions

### 2. Rebar Fixing Services

HILTI rebar fixing systems as per customer or consultant's requirement. Industrial Rebaring Services for perfect grip and performance in concrete work, structural repairs, and wet/dry conditions.

### 3. Core-Cutting Service

Concrete Diamond Core Cutting from 18mm to 500mm diameter with Diamond Drilling System. Specialized core cutting with HILTI Vacuum Cleaners for safe, clean job sites. Cut through Reinforced Concrete, Precast, Brick, Cinderblock, and other structural materials. Openings for doors, windows, ducts and pipes through walls and floors.

#### ⚙️ MORE SERVICES

## Specialized Solutions

### 4. Pull-out Testing Services

Measures working and ultimate capacities of Pull Out Test for Anchor/Rebar. System comprises central hole jack, manual pump with load gauge, flexible hosepipe 5m, and high tensile bolts with coupling. Routine testing qualifies workmanship to required standards.

### 5. Slab Cutting Services

RCC Cutting services with commendable knowledge and rich experience. Unparalleled service executed by our personnel, rendered as per the diverse requirements of clients for floor slab openings and road cutting.

### 6. RCC Scanning

We offer RCC Scanning service with HILTI Scanners which helps to reduce the False Drills in the base material while fixing Anchors and Rebars. This helps locate rebar positions, conduits, and post-tension cables before drilling, ensuring safe and accurate installations.

#### 🔧 ADDITIONAL

## Supply & Fixing Solutions

We also provide one-stop solutions for Supply and Fixing of Base Plates & HILTI Anchors with equal Torqueing for all anchors. This improves Productivity at site and provides quality fastening of the structure joints with RCC to improve the safety and life of the structure.

PRODUCTS

# Our Product Range

We manufacture and supply specialized anchor protection and anti-corrosion products for industrial construction applications.

BEST SELLER

### Anti-corrosive Screw Washer

Washer with Cover Cap

Prevents rusting at screw joints, reduces water leakages, and increases the serving time of screws and metal sheets at joints.

- ✓ Prevents rusting at screw joints
- ✓ Reduces water leakages
- ✓ Saves money by reducing restoration
- ✓ Easy to install, flexible & versatile
- ✓ One piece component

ALL SIZES

### Anchor Protection Cap

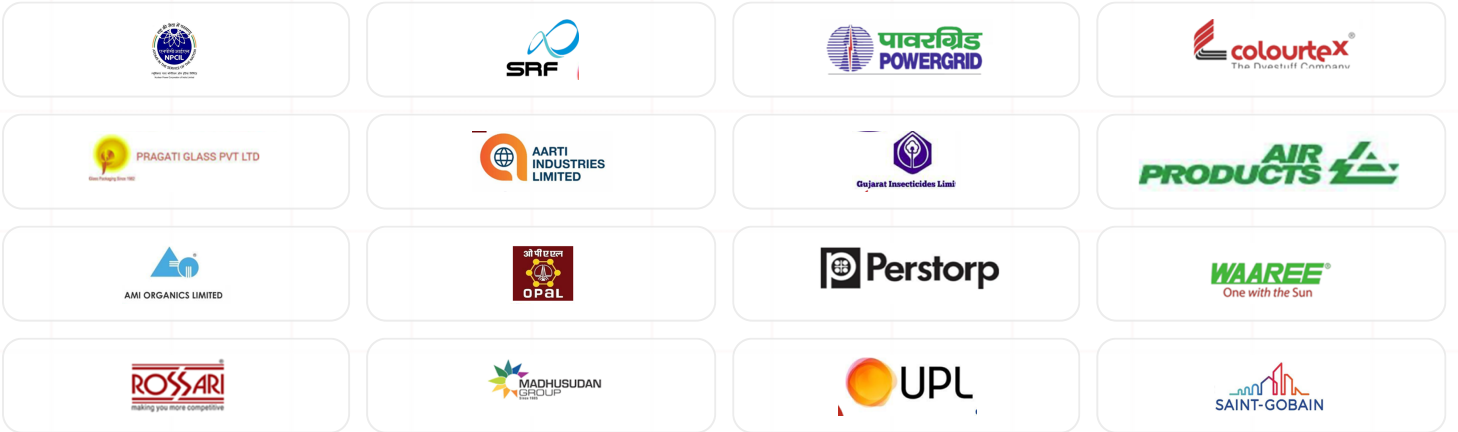

Bolt Joint Covers

Manufactured in all standard sizes and diameters. Provides water/dust/moisture proofing for all bolt joints. Available for every series, suited to any ID or OD.

- ✓ Rust proof structure/machinery bolt joints
- ✓ Reduces maintenance/restoration work
- ✓ Improves plant availability for production
- ✓ Ensures apt fitment for transportation
